

AGRICOLA offers vital agricultural information from 1970 to the present. It contains over 3.7 million citations to journal articles, monographs, theses, patents, software, audio-visual materials, and technical reports related to agriculture. These records describe publications and resources encompassing all aspects of agriculture and allied disciplines, including animal and veterinary sciences, entomology, plant sciences, forestry, aquaculture and fisheries, farming and farming systems, agricultural economics and earth and environmental sciences.

AGRICOLA serves as the document locator and bibliographic control system for the NAL collection. The extensive file provides comprehensive coverage of newly acquired worldwide publications in agriculture and related fields. AGRICOLA is available in two year spreads; 1970-Present and 1984-Present.

Ovid now offers enhanced value to the database through the AGRICOLA Links Package providing links to FREE Open Access Electronic Full Text and useful links to relevant Internet Resources on the Web.
