

The CINAHL database is the authoritative source of information for the professional literature of nursing, allied health, biomedicine, and healthcare. For nearly forty years the Cumulative Index to Nursing & Allied Health Literature® print index has indexed English-language and selected foreign-language journals covering nursing and other specialised health care areas.

The database also includes relevant materials from seventeen allied health disciplines, plus biomedicine, management, behavioural sciences, health sciences librarianship, education, and consumer health. The CINAHL database provides references to books, book chapters, pamphlets, audiovisuals, dissertations, educational software, selected conference proceedings, standards of professional practice, nurse practice acts, critical paths, and research instruments.

Ovid now offers enhanced value to the database through the CINAHL Links Package providing links to FREE Open Access Electronic Full Text and useful links to relevant Internet Resources on the Web.

Links to Electronic Full Text Journals

Listed below are the currently available Open Access journals indexed in CINAHL. On the Ovid platform the links will be for you activated automatically. For SilverPlatter, please follow the simple instructions [here](#) or contact support@ovid.com for further assistance.

Links to Valuable Internet Resources

Ovid can provide one or more of the following Internet Resources, leveraging the full power of the Internet in your users' CINAHL links. To activate simply follow the steps outlined for the [Ovid](#) platforms. Alternatively, please contact your Ovid Customer Support Representative at support@ovid.com.

<p>ARC - Cross Archive Searching*</p> <p>http://arc.cs.odu.edu</p>	<p>ARC is a research service of the Digital Library Research group at Old Dominion University; it uses Ovid's SUBJECTS_ALL field to search ARC's Open Access archives.</p>
<p>BIOME Subject Gateway*</p> <p>http://biome.ac.uk</p>	<p>Uses SUBJECTS_ALL to search UK Biomedical Subject Gateway. BIOME provides access to hand-selected and evaluated, quality Internet resources for students, lecturers, researchers and practitioners in the Health and Life Sciences.</p>
<p>Karolinska Institutet*</p> <p>http://index.it.ki.se</p>	<p>Subject search of the Karolinska Institute Subject Gateway.</p>

Medline Plus*

<http://www.nlm.nih.gov/medlineplus/medlineplus.html>

MedlinePlus is the National Library of Medicine's consumer health Web service, containing extensive information from the National Institutes of Health and other sources on over 650 diseases and conditions. Medline Plus also includes extensive information on prescription and nonprescription drugs, health information from the media, and links to thousands of clinical trials. MedlinePlus is updated daily.

New York Online Access to Health*

<http://www.noah-health.org>

NOAH provides access to high quality full-text consumer health information in English and Spanish from reputable and authoritative Web-based resources.

RDN - Resource Discovery Network

<http://www.rdn.ac.uk>

This portal uses the SUBJECTS_ALL field to search the Resource Discovery Network (RDN) which is the UK's national gateway to Internet resources for the learning, teaching and research community. The service currently links to more than 80,000 resources via a series of subject-based information gateways (or hubs). The RDN is primarily aimed at Internet users for further higher education.

SCIRUS

<http://www.scirus.com>

Scirus is the most comprehensive science-specific search engine on the Internet. Driven by the latest search engine technology, Scirus searches over 167 million science-specific Web pages, enabling you to quickly pinpoint scientific, scholarly, technical and medical data on the Web.:

US Centers for Disease Control*

<http://www.cdc.gov>

The Centers for Disease Control and Prevention (CDC) is recognized as the lead federal agency for protecting the health and safety of people - at home and abroad, providing credible information to enhance health decisions, and promoting health through strong partnerships.

World Health Organization*

<http://www.who.int/en/>

The World Health Organization is the United Nations specialized agency for health. Health is defined in WHO's Constitution as a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.
