

Published by Elsevier and available exclusively through Ovid, EMBiology is a comprehensive bibliographic database offering cover-to-cover coverage of more than 2,800 non-clinical biology journals and trade publications published globally. Many titles indexed are unique to EMBiology including 1,800 not covered in EMBASE. EMBiology currently has more than 4 million records with 250,000 added annually.

Links to Valuable Internet Resources

Ovid can provide one or more of the following Internet Resources, leveraging the full power of the Internet in your users' EMBiology links. To activate simply follow the steps outlined for the [Ovid](#) and [SilverPlatter](#) platforms. Alternatively, please contact your Ovid Customer Support Representative at support@ovid.com.

ARC - Cross Archive Searching

<http://arc.cs.odu.edu>

ARC is a research service of the Digital Library Research group at Old Dominion University; it uses Ovid's SUBJECTS_ALL field to search ARC's Open Access archives.

ChemFinder - Chemical Structures

<http://chemfinder.cambridgesoft.com>

ChemFinder Uses the CAS REGISTRY NUMBER (rn) to provide chemical searching to hundreds of thousands of scientists since 1995. This free database includes: Chemical Structures 2D structures & 3D models; Physical Properties MP, BP, CAS RN, & more; Hyperlinks Links to other websites with information about your compound.

NCBI Taxonomy

<http://www.ncbi.nlm.nih.gov/Taxonomy/taxonomyhome.html/>

Established in 1988 as a national resource for molecular biology information, NCBI creates public databases, conducts research in computational biology, develops software tools for analyzing genome data, and disseminates biomedical information - all for the better understanding of molecular processes affecting human health and disease.

Molecular Sequence Information

<http://www.ncbi.nlm.nih.gov>

RDN - Resource Discovery Network

<http://www.rdn.ac.uk>

This portal uses the SUBJECTS_ALL field to search the Resource Discovery Network (RDN) which is the UK's national gateway to Internet resources for the learning, teaching and research community. The service currently links to more

than 80,000 resources via a series of subject-based information gateways (or hubs). The RDN is primarily aimed at Internet users for further higher education.

SCIRUS

<http://www.scirus.com>

Scirus is the most comprehensive science-specific search engine on the Internet. Driven by the latest search engine technology, Scirus searches over 167 million science-specific Web pages, enabling you to quickly pinpoint scientific, scholarly, technical and medical data on the Web.
