

For more than 30 years Food Science Technology Abstracts (FSTA) has been the essential source of information on food science, food technology, and human nutrition for anyone working in the food sector, whether in industry, government or academia.

FSTA specialist scientists monitor approximately 1800 journals and many other types of literature (books, conference proceedings, theses, patents, standards, legislation, etc.), published in over 40 languages, and select the items relevant to the food sector. They then condense each one into a short, highly informative abstract giving the key points and conclusions, and assign index terms.

Ovid now offers enhanced value to the database through the FSTA Links Package providing links to FREE Open Access Electronic Full Text and useful links to relevant Internet Resources on the Web.

Links to Valuable Internet Resources

Ovid can provide one or more of the following Internet Resources, leveraging the full power of the Internet in your users' FSTA links. To activate simply follow the steps outlined for the [Ovid](#) platform. Alternatively, please contact your Ovid Customer Support Representative at support@ovid.com.

UK Food Standards Agency*

<http://www.food.gov.uk/>

The Food Standards Agency is an independent food safety watchdog set up by an Act of Parliament in 2000 to protect the public's health and consumer interests in relation to food.

UK Institute of Food Research*

<http://www.ifrn.bbsrc.ac.uk/>

The Institute of Food Research (IFR) is a not-for-profit company with charitable status. It is sponsored by the Biotechnology & Biological Sciences Research Council. IFR is the UK's only integrated basic science provider focused on food. Its research is concerned with the safety and quality of food, and improving diet and health in people.

US Agriculture Info Ctr (AgNIC)*

<http://laurel.nal.usda.gov:8080/agnic>

The AgNIC (Agriculture Network Information Center) Alliance is a collaboration between libraries and Cooperative Extension and academic departments within colleges; between states who unite around a common agricultural theme or sub-discipline; between technologists and librarians who are committed to using technology to knit disparate information resources into a cohesive whole. The results of these partnerships are rich collections of essential information and services offered to users around the globe. The collaboration and contributions of the partners allow the institutions to meet local, national, and international needs.

USDA ARS*

<http://ars.usda.gov>

Agricultural Research Service (ARS) is the U.S. Department of Agriculture's main in-house scientific research agency.

US FDA CFSAN*

<http://www.cfsan.fda.gov>

FDA's CFSAN (Center for Food Safety and Applied Nutrition), in conjunction with the Agency's field staff, is responsible for promoting and protecting the public's health by ensuring that the nation's food supply is safe, sanitary, wholesome, and honestly labeled, and that cosmetic products are safe and properly labeled.

US Food Safety*

<http://www.foodsafety.gov>

FoodSafety.gov is a gateway website that provides links to selected U.S. government

World Agricultural Info Center*

<http://www.fao.org/waicent/>

The FAO Web site (<http://www.fao.org>) provides access to information on agriculture, forestry, fisheries, sustainable rural development, economics, food and nutrition. The FAO WAICENT Portal is one of the tools for navigating and accessing the rich content of the site, incorporating the WAICENT Information Finder.
