

GEOBASE is a unique multidisciplinary database supplying bibliographic information and abstracts for development studies, the Earth sciences, ecology, geomechanics, human geography, and oceanography. The database provides current coverage of over 1,800 journals and archive coverage of several thousand additional titles. GEOBASE is unequalled in its coverage of the international literature. Papers are selected, read and classified using a unique classification scheme that is versatile and updated yearly to adapt coverage to current research trends.

Ovid now offers enhanced value to the database through the GEOBASE Links Package providing links to FREE Open Access Electronic Full Text and useful links to relevant Internet Resources on the Web.

Links to Electronic Full Text Journals

Listed below are the currently available Open Access journals indexed in GEOBASE. For SilverPlatter, please follow the simple instructions [here](#) or contact support@ovid.com for further assistance.

ISSN	Journal Title	Ovid Link Target
0305-7364	Annals of Botany	HighWire Free Journals
0099-2240	Applied and Environmental Microbiology	HighWire Free Journals
0006-8705	Bragantia	DOAJ Full Text
0042-9686	Bulletin of the World Health Organization	DOAJ Full Text
0300-5771	International Journal of Epidemiology	HighWire Free Journals
0143-005X	Journal of Epidemiology and Community Health	HighWire Free Journals
0078-3234	Oceanologia	DOAJ Full Text
0102-261X	REvista Brasileira de Geof	DOAJ Full Text
1020-4989	Revista Panamericana de Salud Publica	DOAJ Full Text
0361-5995	Soil Society of America Journal	HighWire Free Journals
0006-3185	The Biological Bulletin	Highwire Free Journals

Links to Valuable Internet Resources

Ovid can provide one or more of the following Internet Resources, leveraging the full power of the Internet in your users' GEOBASE links. To activate simply follow the steps outlined for the [SilverPlatter](#) platform. Alternatively, please contact your Ovid Customer Support Representative at support@ovid.com.

British Geological Survey (BGS) http://www.bgs.ac.uk	The British Geological Survey (BGS) is the world's longest established national geological survey and the UK's premier centre for earth science information and expertise.
GEO-Guide http://www.geo-guide.de	The Geo-Guide is a subject gateway to scholarly relevant websites in earth sciences, geography and mining maintained in cooperation by the Goettingen State and University Library and the University Library "Georgius Agricola" Freiberg.
Geoscience Australia http://www.agso.gov.au	Geoscience Australia is Australia's national agency for geoscience research and geospatial information.
GEsource http://www.gesource.ac.uk/	GEsource, the geography and environment hub of the Resource Discovery Network (RDN), provides access to high quality Internet resources for students, researchers and practitioners in geography and the environment.
Illinois State Geological Survey http://www.isgs.uiuc.edu	ISGS is a premier State Geological Survey with over 200 scientists and support staff who conduct research and provide geology and earth sciences information to the public.

INFOMINE

<http://infomine.ucr.edu>

INFOMINE is a virtual library of Internet resources developed by university librarians. It contains a variety of scholarly resources appropriate for faculty, students, and research staff at the university level.

Mineralogy Database

www.webmineral.com

This mineral database contains over 4,000 individual mineral species descriptions with links and a comprehensive image library.

PSIgate

<http://www.psigate.ac.uk>

PSIgate is a free service that offers access to high quality Web resources in the physical sciences; it contains over 12,000 resources in astronomy, chemistry, earth sciences, materials sciences, physics, and science history and policy.

RDN - Resource Discovery Network

<http://www.rdn.ac.uk>

This portal uses the SUBJECTS_ALL field to search the Resource Discovery Network (RDN) which is the UK's national gateway to Internet resources for the learning, teaching and research community. The service currently links to more than 80,000 resources via a series of subject-based information gateways (or hubs). The RDN is primarily aimed at Internet users for further higher education.

SCIRUS*

<http://www.scirus.com>

Scirus is the most comprehensive science-specific search engine on the Internet. Driven by the latest search engine technology, Scirus searches over 167 million science-specific Web pages, enabling you to quickly pinpoint scientific, scholarly, technical and medical data on the Web.:

US Geological Survey (USGS)

<http://www.usgs.gov>

The United States Geological Survey (USGS) is the U.S. federal source for science about the earth, its natural and living resources, natural hazards, and the environment.
